Feature Comparison 2020

Feature Description		MSRP	Suite \$99	Architectural \$199	Professional \$495
Windows / Doors / Cabinets	Parametric Barn Door. Define a door with surface mounted hardware and that slides to open or close on the wall's face.		+	+	+
	"Fixed" Door Type. Create non-operable doors, like sidelights for entryways, using the "Fixed" door type. Door hinges and hardware are not included by default, but faux hardware can be turned ON if desired.		+	+	+
	Shower Door. Parametric Shower Door Tool is an easy way to quickly place a glass slab door, ½" thick, without casing.		+	+	+
	Door Defaults by Door Type. Set unique door defaults for different types of doors: hinged, pocket, bifold, sliding, barn, fixed, shower, and garage.		+	+	+
	Door and Window Frame Toggle. Choose to include or exclude frame for openings with "Has Frame" controller.		+	+	■
Libraries / Catalogs	Edit Parametric Items in Library Browser. Once saved into the Library, open and edit the properties of Cabinets, Windows, Doors, and other parametric items.		+	+	+
	Patterns and Fill Styles Library. Access your favorite patterns from the Library Browser. Easily apply fills and patterns to objects and materials from their specification dialogs and through the Fill Style Painter tool.		-	+	+
Stairs / Ramps / Railings	Pony Walls and Railings Follow Stairs. Create Fully Housed Stairs using a pony wall with a railing on top and set to follow the slope of the stairs.		-	-	+
Building Tools	Molding Specification. Easily manage moldings attached to an object through the Moldings panel and see a preview of their location in the room.		+	+	+
	Control Moldings per Wall. Specify whether a wall has moldings attached separately from the other walls in an associated room.		+	+	+
	Glass Wall Tool. Use the glass wall tool to quickly draw a new glass wall via the wall parent toolbar.		+	+	+
	Glass Ponywall Tool. Wall tool to quickly draw a glass wall over a solid wall, perfect for showers.		-	+	+
Design Tools	Multiple-Select Editing. Group similar items to modify them at one time; for example, select all your cabinets and change them all with one command.		+	+	■
	Store Callouts and Markers in Library.		-	-	+

	Feature Description	Suite	Architectural	Professional
CAD / Elevations	Find and Replace Text in Plan. Quickly search for and replace words or strings of text used in your project at one time.	+	+	+
	Import / Export files in DXF and DWG file formats.	Export Only	NEW! Import and DWG Support	NEW! DWG Support
3D Tools	Specify Image Size. Set Pixel Resolution and Image Output measurements when exporting images.	+	+	■
	Physically Based Rendering. Improve the quality of your scenes look where lighting, shadows, metal, and surface reflections are concerned with the Physically Based Rendering Technique (also known as PBR).	-	+	+
	Export .DAE 3D files. Includes texture mapping that can be leveraged with external rendering software.	-	+	+
Cost Estimating / Materials List	Add detail to each individual component in the materials list for a comprehensive cost estimate breakdown. For example, assign components to your cabinets, such as doors, pulls, and hinges and assign costs for each item. Access these attributes from the Components panel of its specification dialog.	-	-	+
	General / Support Custom Stylized Themes. Set up Chief's User Interface with color and style themes of your choosing. Set preferences for the look of dialogs, menus, buttons and other interface elements; import, export, and share saved themes.	-	-	+
